qweqweqwerqwr

1. Evidence-Based Intervention/Program/Service Being Implemented (WHAT)

test Describe your evidence-based intervention/program/service being implemented (WHAT)

Project start date:

Project end date:

2. What is the need/rationale for this project?. Why/how did you decide to do this project?. Did anything change from the previous phase to impact the project?.

3. Target audience/TA recipients (WHO and WHERE)

(e.g., behavioral health providers, prevention staff, educators):

- a) Describe the audience (including organizations, individuals, and cultural considerations):
- b) Specify the audience's setting (e.g., emergency departments, schools, opioid treatment programs):
- c) Specify discipline(s) of individuals:
- d) Specify roles of individuals: test test
- e) Specify audience relationship to one another (Choose one):

Single individuals from multiple organizations

Multiple individuals within one organization

Multiple individuals or teams from multiple organizations

Other

If Other, please specify: asdasdasd

f) How were your target audience/TA recipients recruited?

4. Contextual/determinant considerations

(What facilitators are aiding implementation? What barriers are hindering implementation? Include cultural considerations for each category. Update as needed)

Facilitators:

- a) System factors--external to the organization (e.g. , financing; mandates, community, culture):
- b) Organizational factors—internal to the organization (e.g., leadership; readiness):
- c) Individual clinician factors (e.g., alignment with existing practice; complexity):

Barriers:

- a) System factors--external to the organization (e.g., financing; mandates, community, culture):
- b) Organizational factors—internal to the organization (e.g., leadership; readiness):
- c) Individual clinician factors (e.g., alignment with existing practice; complexity):

5. Implementation Strategy (HOW)

Category	Format	Planned Number of Units	Frequency	Brief Description
----------	--------	-------------------------	-----------	-------------------

Select Strategy	Select Format			
	Email/mail In			
	person Phone			
	Virtual/video			
Select Strategy	Website

Describe the sequence of the planned Implementation Strategies, step by step. Edit from previous if the plan changed:

## 6. Evaluation

### a) Target audience/TA participants

How many organizations were planned for enrollment? (number only)

How many individuals were planned for enrollment? (number only)

How many organizations were enrolled?

How many individuals were enrolled?

Percent of organizations initiating at least one implementation strategy?

Percent of individuals initiating at least one implementation strategy?

### b) Proximal Training/TA Outcomes

(e.g., knowledge, skill, confidence, attitudes)

Outcome	How will the outcome be measured?	Results, If Available
23453456	34563456	23452345
asdasd	adsasdasd	wertwetewrtyerwtwryh

### c) Implementation/Sustainment Measures

The RE-AIM Framework is a model for evaluating intervention/program/practice outcomes, as well as the effect of the implementation strategies (implementation outcomes). Review the following for definitions and possible ways to measure outcomes, including culturally focused measures. Then complete the table below.

#### RE-AIM FRAMEWORK

Outcome are measured either at the patients/consumers/participants level (intervention/program/practice outcomes in patients/consumers/participants) or the target audience/TA recipients/organization/setting level (outcomes in the staff/providers or organization).

Dimension	Level
<b>Reach</b> - Absolute number, proportion, and representativeness of individuals who are willing to participate in a given initiative/intervention/program (e.g., consumers who receive the intervention). This includes: (# of individuals receiving intervention)/(# of individuals needing the intervention). Are the people receiving the intervention?	Patients/consumers/participants
<b>Effectiveness</b> - The impact of an intervention on individual outcomes, including potential negative effects, quality of life, cultural, and economic outcomes (e.g., on consumers). Is the intervention effective?	Patients/consumers/participants
<b>Adoption</b> - The absolute number, proportion, and representativeness of settings and intervention agents who are willing to initiate a program (e.g., target audience/providers in an organization who adopt the intervention). Are staff and programs using my intervention?	Target audience/TA recipients/organization/setting
<b>Implementation</b> - The intervention agents' fidelity to the various elements of an intervention's protocol. This includes consistency of delivery as intended, adaptations made, and the time and cost of the intervention. Is the intervention being delivered properly?	Target audience/TA recipients/organization/setting
<b>Maintenance</b>	
<ul style="list-style-type: none"> <li>Patients/consumers/participants level: The long-term effects of a program on participant's outcomes six or more months after the most recent intervention contact.</li> <li>Target audience/TA recipients/organization/setting level: The extent to which a program or policy becomes institutionalized or part of the routine organizational practices and policies.</li> <li>Is the intervention delivered over the long-term?</li> </ul>	Both

Dissemination and implementation research in health: Translating science to practice (2nd ed.). New York: Oxford University Press. Glasgow, R. E., Harden, S. M., Gaglio, B., Rabin, B., Smith, M. L., Porter, G. C., Ory, M. G., & Estabrooks, P. A. (2019). RE-AIM planning and evaluation framework: Adapting to new science and practice with a 20-Year Review. *Frontiers in Public Health*, 7, 64. <https://doi.org/10.3389/fpubh.2019.00064>

Outcome	How did you measure the outcome?	Results, if Available
a) Reach of intervention/program/service (# of individuals receiving intervention)/(# of individuals needing the intervention)		

- b) Effectiveness of intervention/program/service (w/individuals)
  - c) Adoption (#/% of target audience/TA recipients using intervention)
  - d) Implementation fidelity/adherence/quality, cost
  - e) Maintenance (individual effectiveness; target audience/TA recipients' using intervention)
  - f) Other?
-
